12 teams · custom scoring · QB/RB/RB/WR/WR/TE/FLEX/FLEX/K/DEF · 15 rounds · ranked by points above a freely available replacement

- 1

Take the highest number left. The list is already sorted. Cross players off as they go.
- 2

K and DEF in the last two rounds. Never earlier, no matter how good one looks.
- 3

Stop at roughly 6 RB, 7 WR, 3 TE, 2 QB. Past that a pick can't crack your lineup.
- 4

Skip anyone you can't start. Once 2 RB + 2 FLEX are set, another RB is worth far less than the number says.
- 5

Reach only at a tier's edge. If a tier has one or two left and your next pick is far away, take it now.
- 6

Back-to-back picks: scarcer first. You get both players, so take the one less likely to survive.

POSITION	SUBTRACT	POSITION	SUBTRACT
QB	300	RB	196
WR	195	TE	157
K	137	DEF	114

Subtract the position's number from a player's projected season points. That difference is what he is actually worth. A 340-point running back is worth +144; a 340-point quarterback is worth +40, because twelve quarterbacks start and thirty-two running backs do.
